

Bagging Scale — Model FFFP

Economy in weighing of free-flowing grains, seeds, pellets, etc. Gravity fed. Weighing is discharged when operator puts bag on pivoting spout and tilts it toward him.

Available in 3 models: **Floor Portable** (Fig. 56) — for bagging material from scattered bins and spouts; **Overhead Portable** — for running on overhead track and for bagging material from bins in a straight line; and **Overhead Stationary** — for use in fixed location. (*Circle Reply Card No. 56*)

Capacity — 3 bu. (50 to 180 lbs./bag)

Rate — up to (7) 100 lb. bags/min.

Accuracy — ± 2 to 3 oz./bag
